To whom it may concern

03 July 2001

This is to state that as part of the Department of Physics Particle Calorimeter project Environmental Systems Corporation were contracted to build a Class 10,000 Cleanroom with a Class 100,000 Anteroom/Change room in September 1997.

The room was designed and constructed within a very short time-frame (less than six weeks). The contract was completed on time, within the budget, and the room achieved the appropriate certification levels.

Throughout the process Mr Vernon Soloman was a pleasure to work with, exhibiting flexibility and incorporating last minute unscheduled changes to the requirements in a constructive and co-operative professional manner.

The Cleanroom continues to perform well and has essentially been free of problems.

I have no hesitation in recommending Environmental Systems Corporation as experts in the design and construction of Cleanroom facilities, and in the company's ability to successfully deliver the project.

Dr. K. R. Linger
